STATE OF NORTH CAROLINA GOVERNOR'S OFFICE RALEIGH

CLYDE R. HOEY
Governor

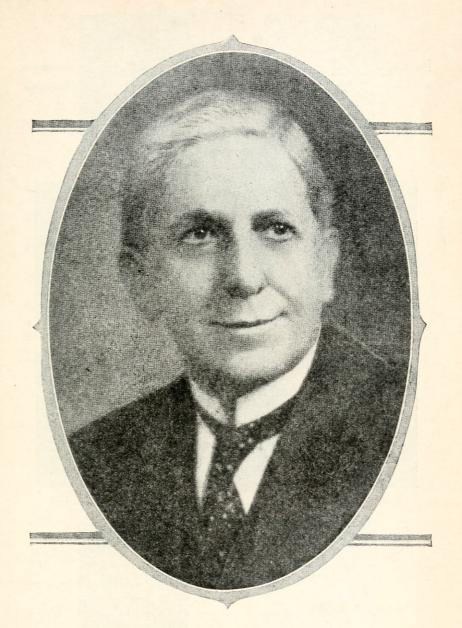

TO ALL NORTH CAROLINIANS:

It should be the desire of every loyal North Carolinian to know more about our state and there is no institution which offers a greater opportunity in this regard than our annual State Fair.

Each year the Fair brings together the East and the West, the people and the products of the Mountains, Piedmont and Coastal Plain. Representatives of agriculture, of industry and business who attend the Fair have impressed upon them their interdependence. The continued progress of our great state depends upon the coöperation and mutual understanding of us all, and it is primarily for that reason that I urge every man, woman and child who can to visit the Fair this year.

Selecting the Right Fertilizer

No one mixture of fertilizer can possibly suit all soil conditions and all crops. Different types of soil, previous treatment, and the crop to be grown must all be considered if best results are to be obtained from commercial fertilizer.

Farmers Cotton Oil Co. has pioneered soil testing among fertilizer companies in North Carolina. We offer this service of testing soil to any farmer who is interested in knowing more about correct fertilizer practices as applied to his farm.

COUNTY PROGRESS EXHIBITS

Department A

F. H. JETER, Director.

Designed to feature present accomplishments in the fields of education, rural life and industrial development of North Carolina, this department of the North Carolina Fair is a new departure in the field of major exhibits. It is the hope and purpose of the management that the exhibits entered shall be miniature expositions of the three great leading industries of each county. In the field of education should be shown the new and progressive ideals and accomplishments with schools of both grammar and high school grades with any phase of the departments of education; in the field of rural life should be exhibited improved farm and home methods showing definite accomplishments on the land by rural men and women, girls and boys, with some of the outstanding movements which have had the support of all the farm people; in the field of industrial development should be shown progress made in the major industries and commercial development of the county whether in the field of mining, manufacturing, lumbering, tourist or any other paramount industry.

These tri-purpose exhibits are being encouraged that the great resources of North Carolina might be brought to the forefront in a fitting and comprehensive manner and it is desired that the county home and farm agents, vocational teachers, school superintendents and principals, boards of trade and chambers of commerce, manufacturers, civic clubs and women's organizations will all have a part in planning and preparing the exhibits displayed. Substantial prizes are offered for the first four places and the judges will consider carefully, in placing the awards, whether the exhibit gives a balanced portrayal of the education, farming and industrial activities of the county.

It is also expected that the three phases of the exhibit shall be attractively displayed with representative materials secured within the borders of the county entered.

The exhibits will be judged according to the following score card:

Balanced Display	40	percent
Representative of County	25	percent
Attractiveness of exhibit	20	percent
Quality of materials	15	percent
Total	100	nercent

Premiums valued at \$1,750.00 are offered in this department and are as follows:

First prize	\$750.00
Second prize	500.00
Third prize	300.00
Fourth prize	200.00
Total	\$1.750.00

Three Desirable Properties in One Form of Nitrogen

UREA NITROGEN

- 1. Initially reduces soil acidity—final effect only slightly acid
 - 2. Readily and completely available to crops
 - 3. Resistant to leaching

These important properties are characteristic of the nitrogen in "High Quality Fertilizers." They are essential for best results in the field.

Urea in your fertilizer or top-dresser is a sure sign of QUALITY. The properties of Urea Nitrogen are fully discussed in our booklet "Urea—Triple Plus Nitrogen." Write for your copy.

Note for Exhibitors: It will avoid confusion and add to the exhibitor's convenience if, so far as possible, entry blanks covering each exhibit to be entered for premiums be filled out in advance and mailed to the Secretary, North Carolina State Fair, Raleigh, N. C. When this is done the entry tags are made out in advance ready for the exhibitor on arrival. This avoids much writing. These entry tags should be secured at the Secretary's office and be presented to the superintendent of the horticultural department or his representative at the same time exhibits are delivered to the department. Entry blanks and catalogs listing the premiums classes can be secured upon application to the Secretary. Read rules Governing Entries, Exhibits and Awards, Pages 17 to 29.

Judge: M. E. GARDNER, Horticulturist, State College, Raleigh, N. C.

Entries Close 12:00 Noon, Monday, October 10th, 1938

Entries open to individual growers and orchard companies of North Carolina.

IMPORTANT. Each exhibitor should read the following carefully:

As far as possible, it is desirable that horticultural exhibits be brought in and set up by the growers. Where this is not possible the Superintendent will be glad to receive and place on exhibit all suitable horticultural products sent in. However, the Superintendent will not pack box, basket, or barrel entries for exhibit. These must come in already packed. All exhibits competing for premiums must be grown in the State.

In sending in fruit for exhibition, select only those specimens that are perfect in form and color, and free from all insect and fungus blemishes. Do not knock or shake off the fruit from the tree, but pick each specimen by hand, taking care not to pull out the stem.

Fruit should be exhibited as nearly as possible in its natural state, and no preference will be given highly polished fruit by the judges.

Fruit to be exhibited in trays, and in plates, should be carefully wrapped and packed. Each fruit should be wrapped separately in paper and packed firmly in box or barrel, taking care to avoid bruising. Label each variety plainly and put in papers to keep varieties separated. Do not use hay, fodder, excelsior, or any other dusty material in packing. Nail up firmly.

IMPORTANT—READ

Address each package plainly to "State Fair, Department of Horticulture, Raleigh, N. C." Each package should be plainly marked with the name and address of the exhibitor. Each package should be plainly marked giving the class in which contents are entered.

PLATES. Plates for the variety exhibits of fruits will be furnished free by the Fair. A perfect plate of fruit should contain five specimens, and no more, characteristic of the variety, with stems attached, of high color, uniform, marketable size, free from cuts and bruises and all insect and fungus blemishes. If additional specimens are sent in by growers, the Superintendent will select and place on exhibit the best possible plate to be made from all the specimens submitted.

TRAYS. The dimensions of the trays are 11½ x 18 x 3 inches inside measurements. The exhibitor should make a tray of the required dimensions and pack each variety to be displayed in this class, in order to know how many apples are needed. Four or five extra apples per tray should be sent in order to allow for rot and damage in transit.

BASKETS. Commercial basket apples should be graded to uniform size, high color, freedom from bruises, insect and fungus blemishes. They should be properly packed and ring faced in standard bushel baskets.

GENERAL RULES. A premium offered for a general collection of fruit will not be awarded to a mere pile of apples, or other fruit, but must be for a real collection, arranged on plates and all correctly labeled, and no fruit will be counted in a collection unless it is a fair specimen of the variety. No trashy fruit of any kind will be counted merely to

make up a collection. A premium for the best collection of grapes, peaches or any other fruit will not be awarded for a mere number, but to the quality of the exhibit mainly. Fruit entered under the heading "Any Other Fruit" should be named, if possible, by the exhibitor.

The superintendent and judges may withhold premiums in any class where the article is not worthy. Exhibitors entering fruit which has been shown before or at other Fairs will be penalized by the judges.

No article entered for competition in any one class will be permitted to compete for a premium in any other class, excepting sweepstakes. An exhibitor cannot compete for more than one prize in any class.

No attention will be paid by the Committee to any fruit or other exhibit that is not arranged in accordance with these rules.

All fruit must be shipped or brought in so as to arrive at the Fair Grounds not later than Monday at 10 a.m., of Fair Week, charges prepaid.

The awards for fruits will be made as soon as possible after the opening of the Fair.

No exhibitor will be allowed to discuss exhibits with the Judges, or to interfere in any way while the Judges are at work.

All fruits shown for premiums must remain in place until the close of the Fair.

In the nomenclature of fruits, the names adopted by the American Pomological Society shall rule, and no variety will be accepted that has not been admitted to their catalogue, except in the case of seedlings never before exhibited.

Read Rules Governing Entries, Exhibits, and Awards, pages 17 to 29.

PLANTS AND FLOWERS

Judge: J. G. WEAVER, Asst. Prof. Horticulture State College, Raleigh, N. C.

Exhibits Must Be Grown in North Carolina Entries Close 12:00 Noon, Tuesday, October 10th, 1938

If necessary exhibits may be shipped to the State Fair, Department of Horticulture, Raleigh, N. C., but flower exhibits are generally brought to the Fair by exhibitors owing to their perishable nature. If shipped they should be packed carefully and the shipment should be accompanied by an entry blank properly filled out and addressed to the State Fair. Catalogs and entry blanks may be obtained from the Secretary's office or on request by mail to the Secretary. Even when flowers or plants are being brought to the Fair entries should be made in advance by mail addressed to the Secretary, N. C. State Fair, Raleigh, N. C., who will gladly furnish entry blanks for the purpose. When exhibits are brought to the Fair the exhibitor should call first at the desk of the entry clerk and get entry tags, then the exhibits and tags corresponding should be delivered to the Superintendents of the Department who will put the exhibit on display. It will greatly facilitate matters for the exhibitor as well as the Fair if entries are made in advance by mail, as this permits writing up tags before the rush and having them ready for the exhibitor on arrival at the entry clerk's desk. The time for closing entries is set late (Tuesday noon) to accommodate exhibitors of cut flowers. Other exhibits, such as potted plants, bulbs, etc., should be entered earlier,—not later than noon Monday of Fair week. Exhibitors should be sure to get their claim checks as they turn over exhibits to the Department. These claim checks should be carefully kept by the exhibitor and brought back at the end of the Fair for use in claiming exhibits. The Superintendent of the Department has no other means of identifying exhibitors and cannot be expected to give out exhibits unless claim checks are presented.

GET YOUR CROPS OFF TO A GOOD START

A healthy start in life is half the battle. Plants, like animals, need plenty of food to get the vigorous start which will help them to ward off diseases and other harmful factors. Experiment stations have found that cotton and tobacco particularly need plenty of potash. Fertilizers for these crops applied at the rate of 400-1,000 pounds per acre should contain 8% potash to insure young plants receiving enough of this necessary plant food. Later in the growing season more potash can

be added in a nitrogen-potash topdresser for cotton and other crops if required. On tobacco an additional side-dresser of potash should be added 20 days after setting plants.

Consult your county agent or experiment station about the fertility of your soil. See your fertilizer dealer. You will be surprised how little extra it costs to apply the right amount of potash. Write us for further information and literature.

CUT FLOWERS

Cut flowers must be in place ready for exhibition Tuesday of Fair week by 12:00 o'clock, soon after which they will be judged. In bringing flowers to the Fair, especially dahlias, they should be carefully packed in boxes without crowding in order to preserve the petals against injury. Damage to petals, especially in the case of dahlias and roses, may affect the score when judging. Flowers should be kept from automobile drafts as much as possible when transporting. In judging classes B-163 to 170, inclusive, consideration will be given to the following points: artistic arrangement of the flowers in the container-60 points; (2) The quality and condition of the flowers-40 points. Emphasis will not be placed on the rarity of the flowers exhibited. In these classes the exhibits must conform to dimensions or conditions stated. The dimensions refer to flowers, basket, basket handle and any ribbon or other attachment. In other words, the dimensions over all. If any dimension is greater or less than class calls for the judges will have to disqualify the entry. Exhibitors are cautioned to see that their baskets are entered in the class conforming to their size. In classes 166 to 168 the exhibit should be appropriate both as to breadth and height over all, including container, for the size of table stated. The judges will consider whether the exhibit is appropriate for its class as well as considering the artistic arrangement of flowers in the container and the quality and condition of the flowers. Except in classes B-163 to 170, inclusive, all cut flowers will be exhibited in vases.

Miscellaneous

This class is for the purpose of stimulating new interest. Entries should be in place by 4:00 p.m. Monday of Fair week. Dish gardens may be arranged on plates, platters, trays, or dishes of any reasonable size. They will be judged on the basis of the craftsmanship of the exhibitor, the artistic qualities of the exhibit and the quality of materials used. The exhibits may represent Japanese gardens, landscapes, farms properly planted, homes, or any other feature. Plant materials should predominate, but any kind of material can be used. To the extent necessary, materials such as mirrors, rocks, ornaments, wood, etc., may be used. It is suggested that the exhibitor limit his exhibit to reasonable size and no exhibit should have any dimension greater than 36 inches.

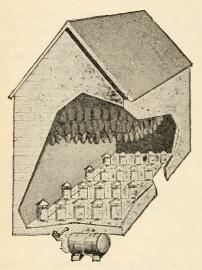

The foregoing suggestions apply also to terrariums. The type of exhibit desired in this class is much like the dish gardens, except that slightly different materials should be used, the materials being placed inside a glass container covered for the purpose of maintaining moist conditions and plants preferring such moist conditions, such as mosses, ferns, etc., should be used. Credit will be given by the judges to the

SMITH'S—THE ORIGINAL OIL-BURNING TOBACCO CURERS

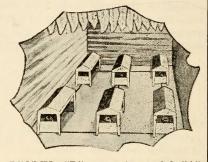

MODEL "A" the first successful—the original—oil-burning tobacco curer ever built is, in our opinion, the most efficient mechanism ever devised for the curing of green leaf tobacco. Each burner is an individual unit within itself, which, according to all reasoning, when burning produces a more evenly distributed heat over the entire barn.

FORREST H. SMITH Inventor of the First Successful Oil Burning Tobacco Curers.

Model "A" the device that revolutionized the curing of tobacco.

MODEL "D", next to model "A" proved to be the most popular curer offered to the public last year. Made of a heavy grade of galvanized steel and of a rigid type of construction, it offers many advantages not offered by other "grouped-burner" systems.

NEW FRUITS, FLOWERS AND VEGETABLES

The Fair solicits exhibits of new horticultural fruits, flowers or vegetables. These should be entered the same as other exhibits in this Department. They will be examined by the judges and if considered sufficiently meritorious will be judged in competition with any other similar exhibits classed as meritorious. Entries should be in place ready for exhibition and judging Tuesday of Fair week at 12:00 o'clock and will be judged soon thereafter. It is suggested that the exhibitor furnish a written statement giving the name of the exhibit and a brief statement explaining the nature, source and important qualities of same. While it is preferred and intended that this class is for service and reward to bonafide originating parties or agencies, it is not necessary that the exhibit be entered by the originator. It is necessary, however, that it must be both new and meritorious and at least closely related to the fruit, flower or vegetable families.

Yields Go Up--Costs Come Down

with BASIC SLAG

The widespread and ever increasing acceptance of Basic Slag speaks for itself. Hundreds of growers are reporting increased yields and better quality at less cost. For Tennessee Basic Slag supplies the six important elements all growing things need—phosphoric acid, lime, manganese, magnesium oxide, iron and silica. These vital elements condition the soil, increase yields, improve pastures, and contribute to quick germination and vigorous, healthy plant growth.

Despite the fact that Tennessee Basic Slag offers all these elements, it is not expensive. Above all, it is one of the most economical of all plant foods to buy and use.

ELECTRIC SERVICEPLAYS A BIG PART

• WHERE IT IS AVAILABLE electric service is playing a large and important role in the changing agricultural policy of this section. It is making possible new farming operations. It is making money and saving money for dairymen, poultrymen, plant growers and truckers. It is making farm life more interesting, pleasanter and more worth while.

• AS THE NUMBER OF CONSUMERS OF electricity has increased the cost of electric service has rapidly decreased until today electricity is the cheapest commodity on the American market.

• NO FAMILY, even those in the most modest circumstances, need deny themselves the comfort, the convenience, and the various other advantages that come through the liberal use of electricity.

• ON THE FARM particularly electric service means more than mere comfort and convenience. It means the conservation of precious eyesight. It means the saving of time and labor, the conservation of food products and the health of the family.

• ADEQUATE AND PROPER LIGHT makes it easier and pleasanter to read, work and study—to say nothing of protecting the eyes and saving doctor's bills.

• THE RADIO brings an endless variety of entertainment, and musical and educational features.

• THE ELECTRIC REFRIGERATOR brings not only food and health protection, but assures a greater variety in diet and the saving of food stuffs formerly wasted.

• THE ELECTRIC RANGE, with its clean, controlled heat, saving the farm woman countless hours of arduous kitchen duty—and makes the kitchen comfortable and attractive.

• THE ELECTRIC IRON, washing machine, food mixing machines and other electrical appliances save time and labor and give added time to the housewife for rest and recreation and for other duties that are pleasanter and, in many instances, more important than housework itself.

SCIENTIFIC FARMING

Greensboro, N. C., July 6, 1938.

THE AMERICAN AGRICULTURAL CHEMICAL Co. Greensboro, North Carolina.

Gentlemen:

After experimenting with practically every brand of standard fertilizers sold in this section, we have proven to our satisfaction that AGRICO returns more dollars per acre than any other fertilizer on the market.

Your discovery that each plant requires a different and particular kind of food, and your practice of examining the soils to find out definitely just how each crop should be fed and then making a fertilizer containing the correct plant foods for each crop, should be worth millions of dollars to the farmers if they will only take advantage of it.

At last you can put the farmer in a position to do his work on a positive and intelligent basis, such as the successful manufacturer, instead of paying for his mistakes of guessing, which we have done in the past.

The field tests we have run and those of other people, with whom we are acquainted, have demonstrated that AGRICO by the side of other fertilizers will give a sufficiently increased yield to more than pay for itself.

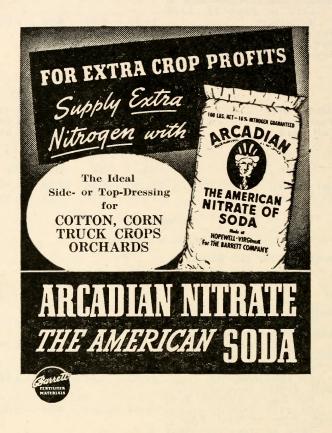

Yours truly,

TOM PEMBERTON.

When such animals are entered without such inoculation they must be sold for immediate slaughter as required by the rules of this department." Any application for permission to make exceptions to this rule should be addressed to the State Veterinarian.

JUDGING SHELLED SEED CORN

A good sample of shelled corn may be described as having a bright color, uniform, plump, well shaped kernels. The kernels should be fairly hard (not soft and starchy), free of blisters or discolorations or excess cob chaff at kernel tips. The sample must be pure as to variety as shown by typical color of the kernels and cob chaff, size and shape of kernels.

OFFICIAL SCORE CARDS—INTERNATIONAL—1937 SHELLED CORN—Score Card

Freedom from diseasePlumpness of kernel tipsFreedom from excessive white starch	10	points
(starchiness) Condition of germ face Size and shape of kernels	15	points
Freedom from damageUniformity	10	points

100 points

Freedom from disease—indications of disease are moldiness, yellow or brown staining near kernel tip, lack of luster. A flinty, lustrous appearance is associated with freedom from disease. Dry rot is frequently present in corn.

Plumpness of kernel tips—shrunken kernel tips are considered to indicate immaturity. Mature, well developed kernels are desirable.

Freedom from excessive starchiness—excessive white starch may be found either at the tip, on the back or near the crown of the kernel. In general a starchy condition of the kernel tips is considered to be most objectionable.

Condition of the germ face—refers to freedom from blistering or discoloration. A badly blistered or dark colored germ face indicates that the germ has probably been injured by freezing.

Size and shape of kernels—under this point distinctly narrow, thin or pointed kernels would be considered objectionable.

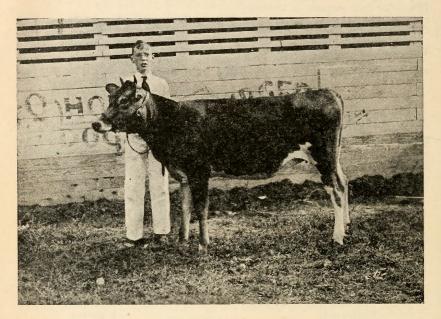

Freedom from damage-refers to the presence of cracked, broken ker-

nels, or mouse damaged kernels. Kernels with tip caps broken off are included under this heading.

Uniformity—uniformity in size and shape and color of kernel and in color indicates freedom from mixtures of varieties or types.

FARM MACHINERY AND TRACTORS

Department O

DAVID S. WEAVER, Director, State College, Raleigh, N. C.

Modern farm machinery has been developed for practically every farm operation, but the farmers of North Carolina have been slow to adopt machines when there was an abundance of farm labor. Gradually, however, machinery is being substituted for horse and human labor in the field. In spite of our high standing in total value of farm crops produced, we make a very poor showing on a per capita income of farm workers basis. Part of this showing may be attributed to the fact that the equipment with which our farm workers provide themselves is not up-to-date and efficient.

Practically every farm machinery manufacturer of any size is concentrating a large sales effort in the Southeast, because, they together with other leading industrialists and thinkers of the nation, realize that to a large extent the future of the nation lies in the South. The South's ability to produce raw materials is unsurpassed, and gradually industry will take advantage of this fact.

The North Carolina State Fair offers an excellent opportunity for bringing to the attention of its thousands of rural visitors the many advantages and improvements of modern farm equipment. A large area has been set aside on the Fair grounds in a most advantageous location, being on the main thoroughfare of the grounds. This means that this prominent position will bring practically every Fair visitor to the exhibits of farm machinery, tractors, road machinery, et cetera. An area for demonstrating tractors, machinery, and trucks is available. Manufacturers may obtain space for displaying their products by writing the manager of North Carolina State Fair, Raleigh, N. C. Space is available at very reasonable rates, and application should be filed as early as possible.

All exhibits must be completed for public inspection by Monday, October 10.

NEW FEATURE OF MACHINERY EXHIBITS

A new and interesting feature of the machinery and tractor exhibits this year will be a parade of this equipment past the grandstand during the afternoon performances preceding the races. Full details regarding this parade may be obtained at the Fair manager's office during Fair week. Machinery, tractors, trucks, and other equipment will have an opportunity to pass in review before the grandstand. Equipment which cannot be transported on its own wheels may be displayed on trucks in the parade. All wheeled equipment must be such as not to destroy the surface of the race track.

HORSE- AND MULE-PULLING CONTEST

Department P

DAVID S. WEAVER-PAUL L. FLETCHER, Directors, Raleigh, N. C.

On Thursday and Friday, a horse- and mule-pulling contest will be held.

Prizes will be:

First prize\$	60.00
Second prize	40.00
Third prize	30.00
	20.00

This pulling contest is the last of a series held in the state during 1938. Teams from all sections of the state are invited to participate. This type of contest has been held for a good many years in the Middle West and is now being carried on extensively in the East. It provides interesting and educational entertainment for people who view it, as well as giving an opportunity for noticing the better effects of good breeding, good hitching, and good horsemanship in obtaining maximum work from draft animals.

The testing is done with a machine known as a dynamometer, which has been purchased by the Department of Agriculture and which is arranged so as to provide an accurate, quickly adjustable, and pre-determined load for the teams to pull. Teams will be divided into classes according to weight if enough variation in weight in the entries exists.

The winner of this pulling contest will be known as the 1938 state champion pulling team. As noted above, attractive prizes are offered for this event.

A novel feature of this pulling contest will be a contest for ox teams. This has not been tried to a very large extent, and should develop a very interesting spectacle. Prizes for the winning oxen will be as follows:

First prize	\$25.00
Second prize	15.00
Third prize	10.00

Single horses will be eligible, as well as teams.

All contestants must provide their teams with strong and adequate harness. Doubletrees and singletrees need not be brought to the Fair grounds. Loud and abusive language will not be permitted, nor will whipping of teams be permitted. Address all inquiries for information to David S. Weaver, Box 5155, State College Station or to Paul L. Fletcher, Dept. of Agriculture, Raleigh, N. C.
